Arista's results highlighted the long-term growth drivers which position the company well for robust demand, with the notable highlights including: 1) large Tier 1 Hyperscaler (we believe based on industry checks to be Microsoft) starting its transition to leveraging Ethernet from InfiniBand in the back-end; 2) conquest wins with a Neo-cloud customer relative to white-box products; and 3) a surge in revenue in relation to scale-across opportunities, while scale-out revenue continues to expand at a robust pace. That said, the strong pace of demand increases are running into hurdles of capacity, which is not specific to Arista but visible across the supply chain, including de-commits in relation to supply from semiconductor companies, leading Arista to now expect translation of some of the demand upsides into revenue to be pushed out of this year. As a silver lining, not only does Arista have longer visibility into demand, but it is also building robust backlog, and separately is also confident of being able to maintain gross margins despite the inflationary cost backdrop, with the help of price increases taken in 1Q as well as pricing for innovation in the future. Going back to the revenue drivers, Arista outlined that the 7800 switches have already established strong market share for the company in scale-across opportunities, driving at least 1/3rd of the updated $3.5 bn AI revenue target for 2026, with the remainder of AI revenues in 2026 being driven by scale-out networks, which are expanding at a robust pace as well. With scale-up opportunities expected to be in early stages in 2027 and ramping in 2028, the combination of scale-out, scale-across, and scale-up opportunities leads us to expect demand acceleration with cloud customers, which will be further augmented by robust enterprise revenue growth that includes the reiterated campus revenue target of $1.25 bn in 2026. While the supply constraints do moderate expectations around the magnitude of upsides that the bull-case incorporated coming into the print, we see limited moderation of the long-term demand drivers that have driven our expectations for around mid-30% growth in the medium-term, with potential greater upsides from the realization of deferred revenue into in-period revenue once there is more significant progress on acceptance clauses, which is currently a significant headwind with product deferred revenue increasing by ~$643 mn to ~$3.63 bn in F1Q. We reiterate our Overweight rating on ANET shares, driven by robust growth drivers, with supply chain dynamics driving some near-term non-linearity in revenues; we maintain our Dec-26 price target at $200.

- **2026 Guidance: Revenue outlook raised primarily on rise in AI networking targets, although the dollar amount of the guide increase was smaller this time.** The revised full-year guide for $11.5 bn of revenue implies ~27.7% y/y growth (compared to JPMe of +28% y/y, consensus of +27% y/y, and prior guide of +25% y/y heading into the print). The dollar amount of the raise in the outlook, $250 mn, compares to the ~$600 mn raise provided in 4Q. Moreover, the entirety of the raise came from a revision to the full-year AI

Summary Investment Thesis and Valuation

Investment Thesis

We rate Arista Overweight and expect material upside in revenue and earnings estimates, led by 1) robust upgrade cycle for networking equipment with cloud customers; 2) steep ramp in Arista's AI revenues; 3) higher-than-peer-group growth outlook in the long term; and 4) acceleration in long-term growth on account of AI spending as well as robust cloud spending in aggregate.

Valuation

We are maintaining our December 2026 price target at $200 based on valuing our 2027E EPS estimate at a ~42x P/E multiple. We believe our target P/E multiple is appropriate given that although it is above the high end of the long-term multiple range of 28-30x, it is justified given visibility into accelerating growth.

target, which was increased to $3.5 bn from $3.25 bn, while the 2026 campus revenue target was reaffirmed; the company still assumes modest growth in the non-AI networking businesses relative to which the company is awaiting higher visibility through the year.

- **1Q26 (Mar-end) Results: EPS beat driven by revenue beat combined with operating leverage; gross margins resilient.** Revenue increased ~35% y/y to $2,709 mn (compared to JPMe of $2,679 mn, consensus of $2,619 mn, and prior guide of $2,600 mn), led by a +36% y/y increase in Product revenue to $2,311 mn and a +27% y/y increase in Services revenue to $398 mn, with growth led by AI and Speciality Providers with neoclouds emphasized. Gross margin tracked to 62.4% (compared to JPMe of 62.5% and consensus of 62.7%, and guide of 62.5% at mid-point), which was down ~100 bps q/q on increasing AI Titan mix of revenues. Operating margins tracked to 47.8% (compared to JPMe of 46.6% and consensus of 46.4%, and guide of 46.0%), benefiting from operating leverage. Consequently, EPS tracked to $0.87 compared to JPMe of $0.83 and consensus of $0.81.
- **2Q26 (Jun-end) Guidance: Revenue and EPS tracked mostly in-line with sell-side expectations, assumptions for modest sequential growth appears to de-risk the full-year growth while leaving room for further upsides.** Arista guided 2Q revenues to $2,800 mn (compared to JPMe of $2,822 mn and consensus of $2,791 mn), which we believe is constrained in relation to q/q increases on account of supply limitations. The 2Q revenue outlook incorporates ~28% y/y growth and implies ~3% sequential growth relative to the strong 1Q, which is lower than typical seasonality in last few years. Additionally, the full-year outlook appears to incorporate only modest sequential increases in both 3Q and 4Q , which in our view de-risks the full-year outlook while leaving opportunity for upsides. For F2Q, gross margins were guided to 62.5% at the midpoint (versus JPMe of 62.6% and consensus of 62.9%), driven primarily by mix, and followed by component cost inflation, and operating margins are expected to track to ~46-47% (compared to JPMe of 47.3% and consensus of 46.5%). Lastly, EPS was guided to ~$0.88, which compares to JPMe of $0.89 and consensus of $0.86.

Risks to Rating and Price Target

Industry Downside Risks

Adoption of white box solutions remains a threat. While it is difficult to drive superior performance using white box solutions (non-branded switches available off the shelf) relative to switches from established technology leaders like Arista or Cisco, the improving capabilities of the white box solutions over time could drive customers to use them for parts of the network with lower performance requirements. Faster-than-expected adoption of white box solutions could imply downside to our Arista earnings forecasts and price target.

Company-Specific Downside Risks

Samik Chatterjee, CFA [AC]
(1-212) 622-0798
samik.x.chatterjee@jpmorgan.com

Faster-than-expected shift toward disaggregated software solutions from data center customers could challenge Arista. Arista delivers industry-leading switching technology through a combination of hardware and software, although a significant portion of the value-add is driven by software. While Arista has already started to offer disaggregated software products to its customers, these do not yet account for a significant portion of revenues. A faster-than-expected shift from customers toward proprietary software and generic hardware could create competitive challenges for Arista.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://.

Coverage Universe: Chatterjee, Samik : Amphenol (APH), Apple (AAPL), Arista (ANET), CDW (CDW), Calix (CALX), Celestica (CLS), Ciena (CIEN), Cisco (CSCO), Coherent Corp (COHR), Corning (GLW), Dell Technologies (DELL), Everpure (P), F5 Inc (FFIV), Fabrinet (FN), Flex Ltd (FLEX), HP Inc (HPQ), Hewlett Packard Enterprise (HPE), Ingram Micro (INGM), Jabil Inc (JBL), Keysight Technologies (KEYS), Lumentum (LITE), Mobileye (MBLY), NetApp, Inc. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
