Intel had substantial upside, as the supply constrained server number is less constrained than we thought. Server demand will stay good, but market share is less clear; on the same trends we see better risk reward elsewhere. Stay EW.

Key Takeaways

- 1Q guidance 3 months ago was too pessimistic and they blew through those numbers
- 2Q guidance also well above - and mgmt says undershipping demand by $1bn plus
- Server CPU market will remain strong but we think x86 loses share to ARM and Intel loses share to AMD within x86, assuming equal supply
- Positive commentary on 14A prospects but nothing tangible; no real color on Terafab
- This situation will stay good as long as server CPUs are sold out - but we see better risk reward in memory which should stay constrained for longer.

What have we gotten wrong here? We have seen product leadership - or at least parity- in servers as a necessary precursor for Intel stock outperformance, which has obviously been wrong. We - and more importantly, key customers- won't believe in external foundry prospects until Intel proves that it can use its fabs to drive advantage in their flagship business, data center CPU, and that is not currently in evidence. 18A is ramping nicely for notebook client, and that's good, but there is no indication that Intel is positioned to regain performance leadership in desktop until year end, and server until end of CY27.

That's still the most critical factor longer term, but an increasingly supply constrained environment for CPUs - caused in part by a lack of Intel supply (much of the incremental y/y growth in DCAI is price, as well as contribution from ASIC/ Networking) is superceding those concerns. That's all stuff that we talked about in our preview, but the quarter played out a little better - with DCAI meaningfully

e = Morgan Stanley Research estimates, a = Actual Company reported data outperforming our ests ($545mn above due to strong sever) and helped somewhat by ASIC strength (up 30% q/q, to ~$325mn) which continues in 2q. Client CPU was also better in Q1 ($223 above our est), with Intel expecting pricing and inventory accumulation to support that segment vs a PC TAM that seems likely to be down 10%+ in 2026. A dynamic we previewed, although the degree of outperformance looks to be greater than we anticipated. There's a great deal of leverage in this model, given low margins currently, but we still have some cynicism.

Mgmt view is dramatic expansion in CPU TAM as CPU to GPU ratios improve, and potential share gains because of supply. CPU is clearly more important to agenetic workloads, but we reject the simply math of CPU to GPU ratios. Intel talked about 8 to 1 GPU to CPU ratios in historic clusters moving to 4 to 1 or lower - but that number is wrong given that Bianca cards have a head node CPU for every two GPUs, plus the host node. It's also a little bit misleading, since the vast majority of Intel CPUs are not in AI data centers, so AI growth is applied to a relatively small portion of the volumes. And there are market share pressures, as NVIDIA is moving some CPU racks from Intel to Vera, Trainium is moving head node from Intel to ARM, both TPU and Trainium are moving host node from x86 to ARM. AMD is likely to favor AMD CPUs. So most of the important CPUs in AI are facing share headwinds.

Intel does have fabs, which is relevant in a shortage, but AMD is likely to articulate that they can get more wafers if they need them; certainly we do not expect AMD to concede share loss over the intermediate term.

The shortage is likely to last for a while, and there is potential for upward revisions over that time frame, but the shortage will be critical to market share prospects until Intel can deliver leadership, which leads us to apply more of a commodity multiple.

Foundry is progressing, though breakeven targets still appear challenging; we would love more detail on Terafab structure. Foundry losses in the quarter remain stubbornly high at $2.4 bn - roughly the same level as the last 4 quarters despite top line growth. There remains an official forecast of breakeven just 7 quarters from now, which seems challenging to us; there is also a caveat that potential foundry wins would cause investments that would push back that date. The biggest factor in foundry breakeven remains higher priced wafers, which is passed on to the product group, so all of this still comes back to having good CPUs.

Intel confirmed a partnership with Terafab, but we're still not sure what that structure looks like. It is not a foundry relationship, as Tesla (covered by Andrew Percoco) will build the fabs. We would hope that given Tesla's substantial spending aspirations that Intel's value capture is strong, but that remains unclear.

Details on the quarter: March non-GAAP revenue of $13.577bn came in above the Street and our estimate of $12.418bn and $12.699bn, respectively. By segment, Client Computing (CCG) revenue was $7.727bn (up 1% y/y), Data Center & AI (DCAI) was $5.052bn (up 22% y/y), and Intel Foundry (IFS) revenue was $5.421bn (up 16% y/y). Gross margin of 41.0% (up 312bps q/q and 184bps y/y) was ahead of the Street and our estimate of 34.8% and 34.9%, respectively. Non-GAAP EPS of $0.29 came in ahead of the Street at $0.02 and our estimate of $0.03.

Details on guidance: Revenue was guided to $14.3bn at the midpoint (up 5.3% q/q and 11.2% y/y), above the Street at $13.105bn and our estimate of $13.258bn. Gross margin of 39.0% was 121bps above our estimate of 37.8% and 298bps above the Street at 36.0%. EPS guidance of $0.20 was above the Street at $0.10 and just below our estimate of $0.13.

Changes to estimates: We model near the mid-point of guidance for the June quarter, expecting non-GAAP revenues, NG gross margin, and NG EPS of $14.339bn/39.1%/$0.21. For CY2026, we model NG revenues, NG gross margin, and NG EPS of $53.097bn/39.0%/$1.12 compared to our prior estimates of $54.286bn/39.1%/$0.68.

We have missed a large move here at EW, and we aren't trying to be stubborn - we just remain cynical on the longer term prospects especially relative to what the stock has done.. Our view has not changed that much as the stock has rallied materially. We like the cost cutting, the disciplined approach to capex, the renewed focus on product, and a more realistic view of foundry and AI prospects. And some of the recent developments, such as the partnership with NVIDIA, are very positive - but despite both managements insisting that the focus is the products, particularly the NVLINK/CPU integration, bulls immediately assume that there will be a foundry component. The stock issuance to the government essentially was Intel issuing stock to fund CHIPs Act money that was already committed.

That said, this music is likely to keep playing for a while, as there is no indication that supply catches up to demand. We just see better risk reward in areas such as memory that do not have Intel's market share concerns, where we feel more comfortable on duration, and where we see balance sheet transformation. We just don't have that conviction for Intel at these levels.

In terms of our price target our CY27 numbers from up from $1.34 to $1.73; maintaining the same target multiple of 42x (high end of peer group due to higher potential for operating leverage) brings the target up from $56 to $73.

Morgan Stanley is acting as exclusive financial advisor to AP Grange Holdings, LLC ("AP Grange") in relation to a definitive agreement with Intel Corporation ("Intel"), for Intel to repurchase the 49% equity interest in the joint venture related to Intel's Fab 34 in Ireland not held by Intel, as announced on April 1, 2026. The transaction is subject to customary closing conditions. AP Grange has agreed to pay fees to Morgan Stanley for its financial advisory services. EQUAL-WEIGHT THESIS

Server market shortages are creating a strong near term environment for everyone in CPUs, but at these levels we need more confidence in an enduring market position. We are skeptical about Intel's ability to regain performance leadership in servers, and to generate high returns on foundry investments

BULL CASE $110.00

~40x CY2027 EPS of $2.75

Intel clearly addresses issues with the pipeline and roadmap delivers competitive performance that stabilizes share

- Management executes on product roadmaps helping investor sentiment and the multiple

- Revenues reach $69bn in CY27, with 50% gross margins

BASE CASE $73.00

~42x CY2027 EPS of $1.73

Server CPU shortages prove to be manageable beyond 12 months, and AMD continues to be in a share gain position.

Given Intel's historic roadmap issues in server; even the foundry successes could prove a distraction relative to the purer goal of making the world's best microprocessors. For us to turn more constructive we would need to see evidence that Intel can regain performance leadership in servers.

BEAR CASE $43.00

40x bear case EPS of $1.07

Cycle turns in 2027 and Intel share losses continue. Data-centric revenue underwhelms due to lackluster product roadmap and foundry dissapoints.

- AMD continues to take share in consumer and cloud segments, with delays in the Intel product portfolio that create risk of erosion in the previously protected enterprise space

- Multiple compresses as Intel is not able to secure meaningful foundry relationships

RISKS TO PT/RATING

RISKS TO UPSIDE

- Foundry partnerships de-risk the story and further improve the multiple
- The company regains lost share in desktop and server following CPU shortages

RISKS TO DOWNSIDE

- AMD competition increasingly becomes more significant, which could lead to further share losses in processors and pressure on ASPs
- Minimal success in foundry leads to an inflated cost structure

Morgan Stanley & Co. LLC makes a market in the securities of Aeva Technologies Inc, Ambarella Inc, Silicon Laboratories Inc..

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of March 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)
