

GLOBAL TECHNOLOGY: SEMICONDUCTOR CAPITAL EQUIPMENT

Can Semi Cap stocks still work from here? Mapping bull/bear WFE scenarios to valuation & raising WFE estimates

The semiconductor capital equipment stocks have outperformed the broader semiconductor sector on a relative basis YTD (our semi cap coverage +68% vs. SOXX +43%) and have rapidly re-rated over the past week as the market has absorbed geopolitical overhangs, leading to investor concerns around stretched valuations - especially if hyperscaler CapEx growth starts to decelerate in CY27/28. Equipment suppliers remain among the highest-quality franchises in semis, but our analysis points to meaningful dispersion in upside across the semi cap complex under different CapEx scenarios.

- **On a relative basis, we believe risk/reward favors AMAT (Buy) and Tokyo Electron (Buy)** as they offer the most asymmetric upside if the AI CapEx cycle extends, with room to re-rate, while KLA (Neutral) appears to have the least favorable risk/reward as we believe it is already pricing in an accelerated cloud spending environment. Our bull/bear analysis suggests that in the most constructive case of +40%/+15% CY27/28 hyperscaler CapEx growth, AMAT has ~51% upside while KLA has ~10% upside from current levels. **In China, we see AMEC and NAURA as attractively valued with idiosyncratic growth drivers.**
- **SemiCap stocks still have upside even if hyperscalers scale back their AI spending, especially if monetization lags.** Our base case scenario assumes hyperscalers spending another \$918bn/\$1.02tr (+28%/+11% YoY) in CY27/28 from ~\$720 bn (+75% YoY) levels in CY26. If hyperscalers pull back on AI spending (bear case of +10%/+5% YoY growth to ~\$831bn in CY28), WFE would decline meaningfully absent a faster-than-expected mature-node recovery - although AMAT and Lam would still have ~29%/~11% upside from current levels.
- **Terafab may drive incremental WFE spending.** Given headlines around Terafab beginning discussions with equipment manufacturers, we see the project as a potential structural source of incremental WFE demand in CY27 and beyond.
- **Given incrementally more positive commentary from SPE suppliers and positive CapEx revisions from hyperscalers,** we raise our 2026/27/28 WFE estimates to \$141/\$186/\$208 bn (+28%/+32%/+12%) from \$132/\$160/\$174 bn (+20%/+21%/+9%), driven by memory and advanced logic.

Semi Cap stocks still have room for upside - we favor Applied and Tokyo Electron on a relative basis

Bottom Line: Following the YTD rally in semi cap stocks after significant CapEx revisions in 1Q earnings season and a constructive WFE set-up driven by the AI momentum, the subsector is discounting a more bullish CapEx backdrop for CY27/28. On a relative basis, our analysis suggests AMAT offers the most attractive risk/reward, with current levels pricing in a below base-case CapEx scenario and implying the greatest upside even if “peak AI CapEx” concerns materialize and hyperscalers significantly slow spending growth (+10%/+5% in CY27/28 after +81%/+75% in CY25/26).

Exhibit 1: AMAT and Tokyo Electron offer the most attractive risk-reward profile while KLAC seems to be priced for a “blue sky” scenario

Implied price and upside/downside (%) from current levels under bear/base/bull scenarios

Source: Goldman Sachs Global Investment Research, FactSet

To address investor concerns around the sustainability of elevated hyperscaler CapEx beyond CY26 and to assess the valuation impact of potential CapEx pullbacks, we build a three-step framework linking (1) hyperscaler gross CapEx to WFE spending, then to (2) the earnings power of AMAT, LRCX, KLAC and Tokyo Electron, and finally to (3) current equity valuations to assess relative risk/reward. We then project CY27-28 hyperscaler CapEx under bear/bull scenarios to quantify downside sensitivity and identify areas of relative resilience across semi cap names.

Our analysis is as follows:

- 1. We expect significant hyperscaler investment to drive CY28E WFE spending to ~\$189bn (Bear) - ~\$223bn (Bull), up from ~\$110bn in CY25, led by leading-edge logic/foundry and memory.** We model gross CapEx by AWS, MSFT, GOOGL, META, and ORCL across Bear/Base/Bull scenarios, with total hyperscaler CapEx reaching up to ~\$1.16tn in the Bull case (+40%/+15% in CY27/28). To translate hyperscaler CapEx into WFE, we apply a 9% WFE sensitivity, consistent with prior KLA and Lam management commentary noting that every ~\$100bn of incremental data center investment generates ~\$8-10bn of WFE demand. We also assume a 50%/50% timing split between t and (t-1) to reflect equipment order lags and separately estimate core WFE growth, assuming a cyclical recovery in mature node logic and NAND-related spending as utilization normalizes and non-AI demand improves over the next several years.

Exhibit 2: Hyperscaler gross CapEx to WFE spending

Source: Company data, Goldman Sachs Global Investment Research

- **We estimate AI-driven infrastructure investment drives CY28E diluted operating EPS to approximately ~\$25.45/~\$12.90/~\$72.60/~\$17.33 (or ~Y2,686) for AMAT, LRCX, KLAC, and Tokyo Electron respectively.** To translate WFE spending into company-specific revenue, we apply WFE betas of 1.05x/1.10x/ 0.95x/1.0x, reflecting the historical tendency for topline growth to closely track the WFE cycle (see [Exhibit 4](#)), with some differentiation by business mix. For example, KLA's process control exposure tends to dampen WFE up- and down-cycle volatility, while Lam's etch and deposition portfolio remains more sensitive to incremental tool spending. We apply a uniform EPS leverage of 1.5x across the group to standardize the framework and abstract away from company-specific operating assumptions for the purposes of this analysis.

- **We believe Applied and Tokyo Electron screen as having the most attractive risk-reward, pricing in a spending environment consistent with our analysts' CapEx estimates at current levels, while KLAC is trading at our CY28E base-case valuation.** We derive implied stock prices by applying 3-year median P/E multiples (21x for AMAT, 25x for LRCX, KLAC and Tokyo Electron) to our CY28E earnings across bear/base/bull scenarios. Although we acknowledge increasing “crowded trade” risk across the broader subsector, AMAT stands out with the greatest valuation headroom and the strongest earnings floor versus peers. Our analysis suggests the market is effectively discounting a bear-case hyperscaler CapEx scenario for AMAT (with ~30% upside even in the bear scenario), whereas KLAC is already pricing a base-case CapEx assumption, with a reversion to Bear-case spending implying ~10% downside from current levels. Conversely, if the hyperscaler CapEx spending accelerates in the coming years, our CY28E framework implies ~51%/~39%/~10% upside for AMAT/LRCX /KLAC, again positioning AMAT as our pick across the semi cap sector, with Lam also offering relatively balanced risk/reward. Tokyo Electron offers an attractive risk-reward even if we were to assume a bear-case scenario.

Terafab

On March 21, 2026, Elon Musk announced Terafab, a fab intended to vertically integrate semiconductor manufacturing under a single facility, with a stated goal of enabling up to 1 TW of annual AI compute capacity. It has been reported that Terafab has begun discussions with key equipment suppliers, including Lam, Applied Materials, and Tokyo Electron. While we take no view on the outcome of these discussions, we view the project as a potential structural source of incremental WFE demand in CY27 and beyond.

China domestic market: Valuation not stretched for AMEC and NAURA

Bottom line: We maintain our positive outlook on China's Semiconductor Production Equipment (SPE) industry, driven by continuously growing semis CapEx in China to build domestic manufacturing capacity. **We conduct a sensitivity analysis** around CapEx growth and domestic supply ratio to evaluate the potential upside/ downside for key SPE names after the share price hikes YTD. Our analysis shows that **AMEC and NAURA** have 11% and 5% share price upsides, respectively, even in a **Bear case**, while in a **Bull case**, share prices could increase by 53% and 46% from current valuation levels. We believe the market has not factored in (1) A potential stronger CapEx growth in 2027/28 comparing to 2026 on the rising demand from memory and AI related applications. (2) expanding revenue opportunities from advanced (memory and logic) production lines driven by domestic demand. (3) Higher supply ratios from Chinese vendors due to supply chain security concerns and cost-saving considerations. **We reiterate our positive view on AMEC (Buy with TP at Rmb471) and NAURA (Buy with TP at Rmb638).**

Exhibit 6: Naura and AMEC both show attractive risk-reward

Implied price and upside/downside (%) from current levels under bear/base/bull scenarios

Base case Rev and EPS are consistent with our latest published estimates

Source: Company data, Goldman Sachs Global Investment Research

We conduct a sensitivity analysis of Chinese SPE vendors by linking (1) semiconductor CapEx to WFE revenues of Chinese suppliers, then to (2) the earnings power of NAURA and AMEC, and finally to (3) current equity valuations to assess relative risk/ reward. **Our analysis is as follows:**

1. Our base case forecast for **China semiconductor capex** shows 5%/ 1%/ 1% growth for 2026-28E ([Read more](#) in our China semis thematic report). However, we expect upside (Bull case shows 5%/ 9%/ 9% CapEx growth in 2026-28E) due to the growing demand from AI devices/ AI data centers, the memory supply gap, recovering industrial demands and more advanced node capacity expansions; and downside (Bear case shows 5%/ 0%/ 0% YoY growth) on potential weakening demand due to depressed consumer demand and tighter constraints of overseas equipment supply.
2. **Domestic companies** to account for 32%/ 36%/ 40% of the China WFE market in 2026-28E in base case, with 32%/ 35%/ 39% in bear case and 32%/ 37%/ 41% in bull case.
3. **Bull case 2027 EPS** are Rmb11.30/ Rmb23.32 (+74% YoY/ +121% YoY) for AMEC and NAURA; **Bear case 2027 EPS** are Rmb8.32/ Rmb15.46 (+29% YoY/ +46% YoY). Base case EPS 2027 is consistent with our last publication at Rmb9.09/ Rmb17.48 (+40% YoY/ +66% YoY) for AMEC and NAURA.
4. Using 51.8x/ 36.5x P/E for AMEC and NAURA, consistent with the multiples implied by our target prices for the two companies, we see **11%/ 5% price upsides even in the Bear cases**. Accordingly, we believe the current valuations are attractive.

Raising WFE estimates with continued strength in memory and foundry

Bottom Line: We are incrementally more positive as semiconductor CapEx datapoints from 1Q earnings drive a meaningful step-up in our WFE outlook, with particular strength from memory as tightness persists across both DRAM and NAND. We raise our 2026/27/28 WFE estimates to \$141/\$186/\$208 bn (+28%/+32%/+12%) from \$132/\$160/\$174 bn (+20%/+21%/+9%), reflecting announced capacity additions by memory players and upward WFE revisions from the SPE suppliers. We continue to view foundry and memory as the primary medium- and long-term drivers of WFE growth, supported by leading-edge momentum amid a strong AI/HPC backdrop and ongoing node transitions, including HBM4/4e. Equipment suppliers also reiterated this earnings season that CY27/28 should represent another period of strength, driven by persistent capacity constraints emerging this year. Given the recent run-up in the semi cap stocks, we remain selectively bullish on the complex and prefer our Buy-rated names including Applied Materials, Tokyo Electron, Lam Research, ASML, ASMI, BESI, Ebara, and Ulvac.

Foundry: We raise our 2026/27/28 Foundry WFE estimates to \$52/\$68/\$78 bn (+30%/+30%/+16% YoY) from \$51/\$64/\$70 bn (+28%/+25%/+10% YoY) prior. Bruce Lu now expects TSMC's total CapEx to reach ~\$200 bn over CY26-28, driven by accelerated cleanroom expansion for N2 and N3 nodes.

DRAM: We raise our 2026/27/28 DRAM WFE estimates to \$46/\$67/\$74 bn (+45%/+45%/+10% YoY) from \$40/\$47/\$49 bn (+25%/+18%/+5% YoY) prior. Since our last update, GS analyst Giuni Lee raised CY26-27 DRAM CapEx estimates by +11%/+30% for Samsung and +14%/+36% for SK Hynix. Following the FY2Q print, we also increased Micron's CY26/27/28 CapEx by +28%/+54%/+18%, reflecting an accelerated expansion of both HBM and conventional DRAM capacity.

NAND: We raise our 2026/27/28 NAND WFE estimates to \$11/\$17/\$20 bn (+40%/+50%/+15% YoY) from \$10/\$15/\$17 bn (+25%/+45%/+15% YoY) prior. GS analyst Giuni Lee increased CY26-27 NAND CapEx estimates by +22%/+19% for Samsung and +10%/+48% for SK Hynix. We expect NAND investment to accelerate meaningfully in CY27/28, though we continue to see the industry remaining supply-constrained over the medium term.

Logic/Other: We adjust our 2026/27/28 Logic WFE estimates to \$32/\$35/\$37 bn (+5%/+9%/+6% YoY) from \$31/\$34/\$38 bn (+3%/+10%/+10% YoY) prior. While we still expect the lagging-edge market to recover into 2027, we see the pace of that recovery as relatively measured.

Exhibit 8: GS WFE Market Forecast (New vs. Old)

We now forecast 28% WFE growth in 2026 (up from 20% prior), driven by DRAM, NAND and Foundry

GS WFE New vs. Old		2026			2027			2028		
\$bn		New	Old	% Change	New	Old	% Change	New	Old	% Change

Exhibit 9: 2026-28 WFE by Application

2026-28 WFE is driven by leading-edge foundry, DRAM (including HBM) and NAND

Source: Company data, Goldman Sachs Global Investment Research

Valuation, key risks, and price targets

Applied Materials (Buy, Covered by Jim Schneider)

We remain Buy rated on AMAT. We expect Applied to outperform peers given outsized exposure to deposition and etch, which should outperform on a relative basis given incremental spending on GAA logic and stacked memory structures. Additionally, we remain positive on the company's portfolio of critical equipment tools, with roughly 30% of systems revenue currently generated from integrated solutions.

Price target. Our 12-m price target of \$390 is based on a 30X P/E multiple applied to our normalized EPS estimate of \$13.00. Key downside risks include: (1) incremental export restrictions; (2) local China-based supplier share gains.

Exhibit 10: AMAT Price target

PRICE TARGET AND RISK/REWARD SUMMARY				
Method	Metric	Base	Bull	Bear
P/E Method	Normalized EPS Estimate	\$13.00	\$14.95	\$11.05
	Multiple	30.0x	31.0x	18.0x
	Valuation	\$390.00	\$463.00	\$199.00
	Upside/Downside	5.4%	25.1%	-46.2%
Price Target	12-Month Price Target	\$390.00	100% P/E	
	Potential Upside/Downside	5.4%		
	Dividend Yield at Current Price	0.5%		
	Potential Total Return	5.9%		

Source: Company data, Goldman Sachs Global Investment Research

Lam Research (Buy, Covered by Jim Schneider)

We remain Buy rated on LRCX. We believe Lam is positioned to outperform peers given its high relative exposure to deposition and etch (intensity should increase) and robust share of NAND equipment upgrades. As NAND suppliers focus on upgrading existing equipment, Lam will benefit disproportionately as that market recovers, augmented by the company's leadership in HBM.

Price target. Our 12-m price target of \$290 is based on a 32X P/E multiple applied to our normalized EPS estimate of \$9.00. Key downside risks: (1) pause in upgrade spending from the NAND suppliers; (2) incrementally punitive export restrictions released by the US government; (3) marked shift in the industry's need for lithography (increase in intensity) vis-a-vis deposition/etch applications.

Exhibit 11: LRCX Price target

PRICE TARGET AND RISK/REWARD SUMMARY				
Method	Metric	Base	Bull	Bear
P/E Method	Normalized EPS Estimate	\$9.00	\$10.35	\$7.65
	Multiple	32.0x	35.0x	25.0x
	Valuation	\$290.00	\$362.00	\$191.00
	Upside/Downside	9.4%	36.6%	-27.9%
Price Target	12-Month Price Target	\$290.00	100% P/E	
	Potential Upside/Downside	9.4%		
	Dividend Yield at Current Price	0.4%		
	Potential Total Return	9.8%		

Source: Company data, Goldman Sachs Global Investment Research

KLA Corp. (Neutral, Covered by Jim Schneider)

We remain Neutral rated on KLAC. We see KLA as a dominant franchise with a ~6.5X market share advantage over its nearest competitor in process control. However, we do not expect process control to outgrow WFE spending in the near term, and we see

KLAC's valuation as relatively full at current levels.

Price target. Our 12-m price target of \$1,550 is based on a 32X P/E multiple applied to our normalized EPS estimate of \$48.50. Key upside/downside risks: (1) sharp increase in Foundry/Logic spending; (2) uncertainty related to export restrictions were to be removed; (3) sharp rebound in Memory WFE spending (vis-a-vis Foundry/Logic); (4) incremental US export restrictions.

Exhibit 12: KLAC Price target

PRICE TARGET AND RISK/REWARD SUMMARY				
Method	Metric	Base	Bull	Bear
P/E Method	Normalized EPS Estimate	\$48.50	\$55.78	\$41.23
	Multiple	32.0x	35.0x	25.0x
	Valuation	\$1,550.00	\$1,952.00	\$1,031.00
	Upside/Downside	-13.9%	8.4%	-42.7%
Price Target	12-Month Price Target	\$1,550.00	100% P/E	
	Potential Upside/Downside	-13.9%		
	Dividend Yield at Current Price	0.5%		
	Potential Total Return	-13.4%		

Source: Company data, Goldman Sachs Global Investment Research

Tokyo Electron (Buy, Covered By Shuhei Nakamura)

Valuation methodology: Our 12-month target price of ¥55,000 is based on our FY3/27-28E EBITDA estimates and the global SPE sector average EV/EBITDA multiple of 18X, to which we then apply a sector-relative premium of 15% (implies FY3/27E P/E of 37X and P/B of 12X). We are Buy rated.

Key risks: A prolonged inventory adjustment phase in the semiconductor industry, further strengthening of export restrictions, and a depressed valuation multiple amid upward pressure on interest rates and other factors.

NAURA (Buy, Covered by Allen Chang)

We are positive on NAURA as a leading local SPE platform provider. The company has accelerated its R&D roadmap to invest in enhanced tools for advanced-node clients. Additional product lines are being developed to offer comprehensive coverage across thermal processes, deposition, etching, cleaning, and ion implantation. Despite elevated near-term R&D spending, we expect sustained growth momentum in both top-line revenue and market share.

Valuation: We are Buy rated on NAURA with a 12-month target price of Rmb638, which is based on 36.5x 2027E P/E. Our target P/E is derived from global SPEs' regression of P/E and forward year earnings growth.

Key downside risks: 1) Further US export restrictions on China semiconductor firms, which could delay their capacity expansion schedule and therefore reduce the demand for NAURA's equipment; 2) Slower-than-expected capacity expansion progress at NAURA's matured nodes customers, which could lead to slower revenue growth than we expect and therefore lower earnings vs. our current estimates.

AMEC (Buy, Covered by Allen Chang)

We are positive on AMEC's expansion towards comprehensive product offerings across etcher, deposition tool, metrology, and CMP tools, along with product mix upgrade towards fulfilling rising spending on advanced nodes. During SEMICON ([Report link](#)), AMEC launched its new ICP etcher, high selectivity etchers and Micro LED MOCVD tools with enhanced performance. The company also announced its plans to acquire 64.69% shares of CMP supplier Hangzhou Sizonetech. We believe AMEC will continue to outgrow the industry given high exposures to Memory customers and rapid production expansions.

Valuation: Our 12-month target price of Rmb471 is based on 43.8x 2029E P/E, discounted back to 2026E at COE of 11%. Our target multiple is based on its long-term EPS growth compared to global peers' P/E vs. EPS growth correlation. The TP implies 51.8x 2027E PE.

Key downside risks: (1) Current trade restrictions do not specifically target matured node fabs, but if restrictions were to expand to matured nodes, it would further reduce demand for AMEC's products. (2) AMEC supplies etchers that can be used for 5nm production lines overseas (i.e., advanced nodes); if its ability to supply such products is hindered, it could lead to further downside risks. (3) Weaker-than-expected capex of major foundries in China.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution				Investment Banking Relationships		
	Buy	Hold	Sell		Buy	Hold	Sell
Global	50%	34%	16%		65%	60%	45%

As of April 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,074 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures**Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at <https://www.gs.com/research/hedge.html>.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies

referred to in this research report. Investment in securities market are subject to market risks. Read all the related documents carefully before investing. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details can be found at: <https://www.goldmansachs.com/worldwide/india/documents/Grievance-Redressal-and-Escalation-Matrix.pdf>, and a copy of the annual audit compliance report can be found at this link: <https://publishing.gs.com/content/site/india-annual-compliance-report.html>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for “professional investors” within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither “registered banks” nor “deposit takers” (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for “wholesale clients” (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom’s departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International (“GSI”), authorised by the Prudential Regulation Authority (“PRA”) and regulated by the Financial Conduct Authority (“FCA”) and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE (“GSBE”) is a credit institution incorporated in Germany and, within the Single Supervisory

Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
