

Global Memory Tech

Weekly theme: upbeat near-term and long-term earnings outlook; lift POs

Price Objective Change

April sales up 100%+; 2027-28 outlook more promising

We were surprised by very strong Taiwan memory companies' April sales (Nanya Tech: +717% YoY; Phison Electronics: +237%) and Korea's semis exports (+173%). In our view, the key driver was stronger DRAM and NAND ASP (up 40-50% QoQ vs consensus 30% range). Most memory chipmakers appear to have turned more bullish due to upbeat April results, continuously rising memory chip price and tight wafer capacity vs 2027-28 chip order outlook. This should lead to semis capex increase, including advanced packaging using TCB. Our memory indicator has also skyrocketed from near-100 (mid-cycle) in 1H25 to 180+ in Feb/Mar (far higher than previous peak of 140 range; see Exhibit 13). Spot price has declined slightly QTD but remains significantly higher than normal level.

PO revisions mostly based on higher EPS estimates

We raise our POs for Samsung Electronics (SEC; new PO W370,000, +19% vs old), SK Hynix (W2,100,000, +17%), Nanya Tech (NT\$440, +10%), Phison Electronics (NT\$3,500, +17%), Wonik IPS (W95,000, +19%), Hanmi Semi (W500,000, +19%) and ASMPT (HK\$220, +16%), based on 10%+/- 2026-28 EPS estimates. The 5-10% higher ASP assumptions (or 10%+ for sales forecasts) for memory chipmakers, which are also expected to increase equipment spending more actively in 2028 once new shell fabs are constructed in 2027, are the key reasons for our EPS and PO revisions.

Target P/E still 8-10x for SEC, Hynix and Nanya Tech

Our target P/E for SEC (10x based on 2026-27E EPS vs old 9x given stronger earnings outlook with higher memory chip price), SK Hynix (8x vs 7x due to better outlook; thus PO revision mostly based on EPS estimate and target P/E change) and Nanya Tech (8x vs 9x previously, given lower 2027 EPS growth following a very strong 2026 upturn) is broadly low. That said, our POs for all three companies imply 30-50% stock upside.

Wonik IPS vs Phison/Hanmi/ASMPT under AI theme

Phison (NAND storage product supplier) reported record-high OP margin (36%) in its 1Q26 results vs only 7% for Wonik IPS (CVD equipment for DRAM/NAND). Phison's management also stated that 1Q level of GM (61% vs long-term historical average of 30% range) looks sustainable with rising enterprise solutions sales. We also see Wonik IPS' earnings turnaround coupled with memory chipmakers' capex increase but it must compete with global leaders (Applied Materials, LAM Research, Tokyo Electron, etc.). This should be the discount factor for Wonik IPS (target 2026-27E P/E: 23x; unchanged) vs Hanmi Semis (47x 2028 EPS; also unchanged) and ASMPT (35x 2027-28E P/E; since long-term order rises, 2028E EPS included; old was also 35x 2027E P/E), which will benefit from chipmakers' HBM capacity expansion more specifically in 2028 or after. We lower our target 2027E P/E for Phison from 27x to 23x but 40%+ stock upside seen. More details on company-specific valuations (SEC, Hynix, Nanya Tech, Phison Electronics, Wonik IPS, Hanmi Semi and ASMPT) are on Page 2-3.

BofA GLOBAL RESEARCH

See glossary at the end of this report

Company specific valuations

We present company-specific valuations.

Samsung Electronics (005930 KS; B-1-7; PO W370,000)

Our new PO of W370,000 is derived from 10x 2026-27E P/E (vs old PO W310,000 based on 9x), which still appears much lower than long-term historical average (13x) largely due to limited QoQ OP growth after 2Q26 upturn. Our GDR PO of US\$6,250 is automatically calculated at an FX rate of near-W1.48k/USD. Our new PO of W277,000 (vs W233,000 previously) for the preferred shares is based on a 25% fair discount (close to past 12-month average) to the common shares, given no voting rights. However, the dividend amount is almost the same for both types. This offers a higher yield for the preferred shares vs the common. The discount ratio (preferred share price vs common) was c.10% in 2021-22, but it rose to near-20% in 2024-25 (undervalued vs the common).

SK Hynix (000660 KS; C-1-7; PO W2,100,000)

We raised our PO to W2,100,000 using higher 2026-27E P/E of 8x (PO W1,800,000 based on 7x previously). Our fair P/E multiple of 8x is in fact much lower than the 2016-25 average (12x). We believe the company's already proven strong 2025 results and new record-high 2026-27E earnings with HBM leadership and high margin profile will lead to a re-rating to >8x fair P/E.

Nanya Tech (2408 TT; B-1-7; PO NT\$440)

Our PO of NT\$440 is derived from 8x 2026-27E P/E (vs old PO NT\$400 based on 9x), which is around 40% lower than long-term historical average (13x during 2014-25) but near-30% higher than previous upturn period (6x in 2014-18). Memory stocks usually trade at low valuation multiples during peak cycle due to downturn concern. However, current DRAM cycle looks much better than ever and we expect 2027-28 earnings to exceed 2026 level due to AI growth theme. This should lead to re-rating (e.g., 8x P/E or higher), with solid earnings outlook.

Phison Electronics (8299 TT; B-2-8; PO NT\$3,500)

Our new PO of NT\$3,500 is derived from 23x 2027E P/E (vs old PO NT\$3,000 based on 27x P/E). This is 30-50% higher than historical year-average P/E of mid to high teens. However, Phison's 2026-27 earnings are expected to be 100%+ higher than long-term historical average or even compared to 2025 peak (e.g., ROE: 50%+ in 2026 vs 10-30% in 2020-25). Key contributors should be memory product price strength, well secured NAND chip sourcing and growth opportunities with AI ecosystem module solutions (eSSD, aiDAPTIV solutions, boot drive, etc; already 38% of 1Q26 total sales vs sub-10% in 1Q-4Q25).

Hanmi Semi (042700 KS; C-1-7; PO W500,000)

Our new PO of W500,000 (vs old PO W420,000) is derived from 47x 2028E P/E (unchanged). This is near-30% lower than 2024-25 average (30-120x range or mean of 60x) to be conservative. The reason we use 2028E EPS is because of the significant impact of newly constructed fabs in Korea with meaningful ramp-up in 2028E (Hynix's Yongin fabs, Samsung's P5). We believe strong earnings growth with high margins through 2H26 and 2027-28 will warrant for high P/E multiples that were proved over the past two years.

ASMPT (522 HK; C-1-7; PO HK\$220)

Our new PO of HK\$220 (vs old PO HK\$190) is derived from 35x 2027E P/E (unchanged). The 35x is higher than the long-term historical average of 25x (2014-23) but much lower than 2024-25 highs (over 100x due to exceptionally low EPS vs the stock rally). We estimate ASMPT's 2027-28 EPS to reach upcycle level (HK\$6-7), which should warrant a fair P/E of mid- to high-30x as seen in 2020/23. Upside risk is stronger TCB orders for memory and logic, while downside risk is mostly related to market-share loss to Korean/Europe competitors.

Wonik IPS (240810 KS; C-3-7; PO W95,000)

Our new PO of W95,000 (vs old PO W80,000) is based on 23x 2026-27E P/E (unchanged), which is about 40% higher than long-term historical average given Samsung's gradually increasing capex spend even for conventional memory.

Samsung Electronics (005930 KS; B-1-7; PO W370,000)

Exhibit 3: Our 2026-27E EPS revisions (up 5-6%) are mostly based on stronger sales (up 6-9%), which offset our more conservative DRAM/NAND OPM assumptions

Nanya Tech (2408 TT; B-1-7; PO NT\$440)

Exhibit 8: Robust April sales (NT\$25.5bn; +40% MoM, +717% YoY) well-observed and we expect strong DRAM ASP momentum to continue; as such, our higher 2026/27E EPS estimates (up 26%/33%) are mostly based on stronger sales (up 20-30% range) and OPM accretion (up 1-3ppt)

ASMPT (522 HK; C-1-7; PO HK\$220)

Exhibit 11: Our estimate revisions are mostly 2028-centric as we assume stronger impact of TCB orders; accordingly our 2028 EPS revision is up 15% based on 13% higher sales and slightly stronger GM (0.5ppt) assumption

BofA GLOBAL RESEARCH

BofA Memory Indicator

Exhibit 13: Our memory indicator reached a record-high level of 186/189 in Feb/Mar-26, driven by exceptionally strong DRAM/NAND spot prices, rising ASPs/billings, and Korea's 100%+ export growth

BofA Memory Indicator – back to upturn level since Oct-2025 and hit highest peak in Mar-26 (back-tested)

Note: Our indicator had previously been capped at ~140, but the recent unprecedented surge—driven by memory spot prices, ASPs, and billings—has led us to raise the ceiling (up to 240 levels) to reflect a more accurate relative comparison. This exceptional strength is further validated by strong earnings from memory chipmakers.

*The shaded area represents back-tested results from January 1991 to March 2021. The unshaded area represents actual performance since April 2021. This performance is back-tested up to March 2021, and does not represent the actual performance of any account or fund. Back-tested performance depicts the theoretical (not actual) performance of a particular strategy over the time period indicated. No representation is being made that any actual portfolio is likely to have achieved returns similar to those shown herein.

Disclaimer: The BofA Memory Indicator is intended to be an indicative metric only and may not be used for reference purposes or as a measure of performance for any financial instrument or contract, or otherwise relied upon by third parties for any other purpose, without the prior written consent of BofA Global Research. This indicator was not created to act as a benchmark. For methodology, see the [5 Aug 2024 Global Memory Tech](#) report.

BofA GLOBAL RESEARCH

Exhibit 14: Apr prices hit record-high level led by Samsung (upbeat 1Q results, high optimism on HBM4 upside, relatively higher exposure in conventional DRAM), SK Hynix (strong 1Q results, dominant position in HBM3e/4), and Nanya Tech (record-high monthly sales in Jan-Apr; up +500-700% range YoY)

BofA Memory Indicator is highly correlated with stock performance (back-tested)

Note: Memory companies share price is average of Samsung, Hynix, Micron, and Nanya share price YoY changes

Source: Bloomberg, BofA Global Research

The light green shaded area represents back-tested results from January 1991 to March 2021. The blue shaded area represents actual performance since April 2021. This performance is back-tested and does not represent the actual performance of any account or fund. Back-tested performance depicts the theoretical (not actual) performance of a particular strategy over the time period indicated. No representation is being made that any actual portfolio is likely to have achieved returns similar to those shown herein. For methodology, see the [5 Aug 2024 Global Memory Tech](#) report.

BofA GLOBAL RESEARCH

Exhibit 15: HBM/DDR5 and legacy DRAM drove the YoY rebound in Mar, with DRAM ASP/billings up (+190%/+250%) and NAND (+217%/+347%); momentum extended into Apr with sharp YoY gains in spot prices (DRAM +902%, NAND +654%) and Korea semis exports (+173%)

Notes: *Mar-26 results recovered in all aspects in terms of MoM and YoY growth

**For Apr-26, only spot prices and exports are reported so far

***DRAM spot price is based on weighted average MoM change of 16Gb DDR5, 16Gb DDR4 and 8Gb DDR4; NAND spot price is based on MoM change in 512Gb wafer spot price

BofA GLOBAL RESEARCH

Exhibit 16: The indicator averages 131 during peaks and 87 during troughs; the current Mar indicator value (189) far exceeds prior peaks and marks a record high. Cycles typically last ~18 months, though the latest saw a shorter 7-month downturn followed by a sharp 12-month recovery.

Memory indicator historical peak and trough levels

Memory spot/contract price trend

Exhibit 23: DRAM spot price further softened in early-May (mostly led by DDR4, while DDR5 relatively remained stable) after an exceptionally strong rally from Sept-25 to Jan-2026. DRAM price hit the highest level in the past 25 years as the current mainstream DRAM 16Gb DDR5 stood at US\$39 and 16Gb DDR4 at \$60 as chipmakers reallocated production to HBM and server-grade DRAM. Previous high level was in Oct-17, but it was only \$10 range.

Price objective basis & risk

ASMPT (ASMVF)

Our PO of HK\$220 is derived from 35x 2027E P/E. The 35x is higher than the long-term historical average of 25x (2014-23) but much lower than 2024-25 highs (over 100x due to exceptionally low EPS vs the stock rally). We estimate ASMPT's 2027-28 EPS to reach upcycle level (HK\$6-7), which should warrant a fair P/E of mid- to high-30x as seen in 2020/23. Upside risk is stronger TCB orders for memory and logic, while downside risk is mostly related to market-share loss to Korean/Europe competitors.

Hanmi Semiconductor (HNSIF)

Our PO of W500,000 is derived from 47x 2028E P/E. This is near-30% lower than 2024-25 average (30-120x range or mean of 60x) to be conservative. The reason we use 2028E EPS is because of the significant impact of newly constructed fabs in Korea with meaningful ramp-up in 2028E (Hynix's Yongin fabs, Samsung's P5). We believe strong earnings growth with high margins through 2H26 and 2027-28 will warrant for high P/E multiples that were proved over the past two years.

Upside risk should be stronger TCB orders from Hynix, Micron and even Samsung Electronics.

Downside risk is mostly related to market share loss to competitors (ASMPT, Hanwha Semitech).

Nanya Technology (NNYAF)

Our PO of NT\$440 is derived from 8x 2026-27E P/E, which is around 40% lower than long-term historical average (13x during 2014-25) but near-30% higher than previous upturn period (6x in 2014-18). Memory stocks usually trade at low valuation multiples during peak cycle due to downturn concern. However, current DRAM cycle looks much better than ever and we expect 2027-28 earnings to exceed 2026 level due to AI growth theme. This should lead to re-rating (e.g., 8x P/E or higher), with solid earnings outlook.

Upside risks: DRAM price increase even after 2H25-1H26 upturn, Big 3 memory chipmakers' significant supply cut for commodity DRAM due to HBM, and more successful ramp-up of DDR4 or DDR5 (better cost or margin improvement).

Downside risks: weaker legacy DDR4 demand (quicker shift to DDR5), and China's more successful memory production increase.

Phison Electronics (PISNF)

Our PO of NT\$3,500 is derived from 23x 2027E P/E. This is 30-50% higher than historical year-average P/E of mid to high teens. However, Phison's 2026-27 earnings are expected to be 100%+ higher than long-term historical average or even compared to 2025 peak (e.g., ROE: 50%+ in 2026 vs 10-30% in 2020-25). Key contributors should be memory product price strength, well secured NAND chip sourcing and growth opportunities with AI ecosystem module solutions (eSSD, aiDAPTIV solutions, boot drive, etc and already 38% of 1Q26 total sales vs sub-10% in 1Q-4Q25).

Samsung Electronics (SSNLF / SSNHZ)

Our PO of W370,000 is derived from 10x 2026-27E P/E, which still appears much lower than long-term historical average (13x) largely due to limited QoQ OP growth after 2Q26 upturn. Our GDR PO of US\$6,250 is automatically calculated at an FX rate of near-W1.48k/USD.

Downside risks are mostly related to US tariffs, 12/16-hi HBM execution, memory price cuts, large foundry loss and aggressive capex increase.

Upside risks could come from US Big Tech (new orders for HBM and even 2nm node foundry), conventional memory cycle (significant price hike), restructuring plan (significant cost cut) and shareholder return (payout ratio increase).

Samsung Electronics Preferred (SSNNF)

Our PO of W277,000 for the preferred shares is based on a 25% fair discount (close to past 12-month average) to the common shares, given no voting rights. However, the dividend amount is almost the same for both types. This offers a higher yield for the preferred shares vs the common. The discount ratio (preferred share price vs common) was c.10% in 2021-22, but it rose to near-20% in 2024-25 (undervalued vs the common).

Our valuation of the common shares is derived from 10x 2026-27E P/E, which still appears much lower than long-term historical average (13x) largely due to limited QoQ OP growth after 2Q26 upturn. Our GDR PO of US\$6,250 is automatically calculated at an FX rate of near-W1.48k/USD.

Downside risks are mostly related to US tariffs, 12/16-hi HBM execution, memory price cuts, large foundry loss and aggressive capex increase.

Upside risks could come from US Big Tech (new orders for HBM and even 2nm node foundry), conventional memory cycle (significant price hike), restructuring plan (significant cost cut) and shareholder return (payout ratio increase).

SK Hynix (HXSCF)

Our PO of W2,100,000 is derived from 8x 2026-27E EPS. Our fair P/E multiple of 8x is in fact lower than the 2016-25 average (12x). We believe the company's already proven strong 2025 results and new record-high 2026-27E earnings with HBM leadership and high margin profile will lead to a re-rating to >8x fair P/E. Upside risk is stronger HBM demand from US Big Tech, further price hike of commodity DRAM, and unexpected

supply disruption from its memory peers. Downside risk is competitors' more aggressive capex increase.

Wonik IPS (XRHQF)

Our PO of W95,000 is based on 23x 2026-27E P/E, which is about 40% higher than long-term historical average given Samsung's gradually increasing capex spend even for conventional memory.

Upside risks: stronger-than-expected equipment order levels

Downside risks: significant market-share loss to foreign equipment vendors or steeper order cuts than envisaged from Samsung and Hynix.

Analyst Certification

We, Simon Woo, CFA and Matt Shin, hereby certify that the views each of us has expressed in this research report accurately reflect each of our respective personal views about the subject securities and issuers. We also certify that no part of our respective compensation was, is, or will be, directly or indirectly, related to the specific recommendations or view expressed in this research report.

Equity Investment Rating Distribution: Technology Group (as of 31 Mar 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	234	58.50%	Buy	123	52.56%
Hold	90	22.50%	Hold	43	47.78%
Sell	76	19.00%	Sell	23	30.26%

Equity Investment Rating Distribution: Global Group (as of 31 Mar 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1993	55.76%	Buy	1186	59.51%
Hold	821	22.97%	Hold	509	62.00%
Sell	760	21.26%	Sell	400	52.63%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the [Price Charts website](#), or call 1-800-MERRILL to have them mailed.

BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Samsung Electronics.

The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Nanya Tech, Samsung Electronics, SK Hynix.

BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: ASMPT, Nanya Tech, Samsung Electronics, SK Hynix.

The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: ASMPT, Nanya Tech, Samsung Electronics, SK Hynix.

In the US, retail sales and/or distribution of this report may be made only in states where these securities are exempt from registration or have been qualified for sale: ASMPT, Hanmi Semiconductor, Nanya Tech, Phison, Samsung Electronics, SK Hynix, Wonik IPS.

BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Samsung Electronics, SK Hynix.

BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Nanya Tech, Samsung Electronics, SK Hynix.

The country in which this issuer is organized has certain laws or regulations that limit or restrict ownership of the issuer's shares by nationals of other countries: Nanya Tech, Phison.

The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Nanya Tech, Samsung Electronics, SK Hynix.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.

The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

Refer to [BofA Global Research policies relating to conflicts of interest](#).

"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

This information is prepared for the use of BofA Securities clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of BofA Securities. This document and its content is provided solely for informational purposes and cannot be used for training or developing artificial intelligence (AI) models or as an input in any AI application (collectively, an AI tool). Any attempt to utilize this document or any of its content in connection with an AI tool without explicit written permission from BofA Global Research is strictly prohibited. BofA Global Research utilizes AI, including machine learning and other technologies, to enhance the services we provide to our clients. These technologies assist our analysts in various aspects of their work, including but not limited to data analysis, content extraction, content creation, data aggregation and summarization and identifying relevant information from diverse sources. All AI-driven processes are subject to review by BofA Global Research employees. BofA Global Research information is distributed simultaneously to internal and client websites and other portals by BofA Securities and is not publicly-available material. Any unauthorized use or disclosure is prohibited. Receipt and review of this information constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion, or information contained herein (including any investment recommendations, estimates or price targets) without first obtaining express permission from an authorized officer of BofA Securities.

Materials prepared by BofA Global Research personnel are based on public information. Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS or any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to sustainability in this material is limited as discussed herein and is not intended to provide a comprehensive view on any sustainability claim with respect to any issuer or security.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
