Inline 1Q26 OP with another large recovery in memory margins

Samsung Electronics (SEC) reported 1Q26 revenue of W133.9tn and operating profit of W57.2tn, in line with its pre-earnings guidance of W133tn/W57.2tn, respectively. Memory profit was largely inline with our expectations post the pre-earnings guidance, where we believe the company saw another large recovery in its DRAM operating margin to a high-70% level (+22%pt qoq) and NAND OPM to high-50% level (+33%pt qoq) during the quarter, driven by strong pricing growth.

We expect the strong earnings power led by memory to continue, supported by our expectation of solid memory pricing continuing and also remaining at an elevated level. We expect this to be helped by the long-term agreements (LTA) with customers, with a higher level of binding commitment likely this time compared to the past. The company is starting to show meaningful progress in HBM, and also considering the higher scope for meaningful shareholder returns, we remain constructive on the name trading at 4.2X P/E and 1.5X P/B on 2027E numbers with 40%+ ROE. Reiterate Buy with an updated 12m TP of W320,000.

Key takeaways

- **Strong memory pricing growth led by server demand:** SEC saw another significant ASP increase (DRAM +93% qoq, NAND +89% qoq) during the quarter, with the expansion of agentic AI especially leading to a strong server memory demand (server DRAM bit shipment grew low-teens% qoq and for NAND grew low-20% qoq) during the quarter. We also believe the company saw its server DRAM pricing grow around 120% qoq and reaching around US\$ 1.4/Gb, which would be higher than the HBM ASP we are assuming for the company during the same

quarter. We note that SEC saw its DRAM and NAND ASPs grow materially higher compared to its memory peer SK Hynix during the quarter, likely due to the former's higher exposure in conventional memory where pricing continues to rise substantially.

- **Record low memory demand fulfillment rate:** During the call, SEC mentioned several times that there is not enough supply in the industry that would be able to resolve the current memory supply shortage. Adding the tight inventory level across suppliers and customers, the company believes the current memory demand fulfillment rate is at a record low.
- **2027 to be an even tighter year for memory:** SEC believes strong memory demand will continue amid AI infrastructure expansion. The company mentioned that it is already discussing demand for 2027 with its major customers, and that the pre-booked demand alone indicates that the supply and demand imbalance this year will widen in 2027. As such, we raise our conventional DRAM and NAND pricing assumptions for the next couple years, and especially expect conventional DRAM ASP this year for SEC to rise 370% yoy (from +324% previously), and the same for NAND to grow +250% yoy (from +216% previously).
- **Continued confidence in HBM:** SEC continued to display its confidence on HBM, reiterating its target of increasing its HBM sales by more than 3X this year. The company also mentioned that its production-ready capacity has been sold out, and HBM4 ramp-up has been progressing inline with its plan, with meaningful volume starting from 2H26. SEC also mentioned that HBM4 will comprise over 50% of its HBM sales from 3Q26, and will also take up half of its HBM sales that it expects this year. We continue to expect a significant growth in SEC's HBM business this year driven by stronger demand from ASIC customers (especially from SEC's strong positioning in Google TPU) and increased market share in Nvidia (mainly in HBM4), and estimate revenue will grow 197% yoy to over US\$17bn (from US\$6bn last year).
- **LTAs different from the past in that they are relatively more binding this time:** SEC mentioned major customers are confident in future AI demand and are approaching the company to seek mid-to-long term volume commitments. The company has already signed an LTA with a customer, and believes long-term agreements (LTAs) will provide better business stability and visibility. The company believes LTAs this time around present a higher level of binding commitment, which would make it different from the past.

Raise earnings estimates and TP to W320,000; remain Buy rated

Mainly reflecting higher conventional DRAM and NAND ASP assumptions and higher HBM revenue estimates, we raise our 2026E/2027E/2028E EPS estimates by 14%-55%. Accordingly, our 2026E SOTP-based 12m TP is raised to W320,000 (from W285,000).

We expect the strong earnings power led by memory to continue, supported by our expectation of solid memory pricing continuing and also remaining at an elevated level. We expect this to be helped by the long-term agreements (LTA) with customers, with a higher level of binding commitment likely this time compared to the past. The company is starting to show meaningful progress in HBM, and also considering the higher scope for meaningful shareholder returns, we remain constructive on the name trading at 4.2X

P/E and 1.5X P/B on 2027E numbers with 40%+ ROE. Reiterate Buy.

For the preference shares (005935.KS, Buy), we raise our 12m TP to W245,000 (from W220,000), applying our target pref to common discount of 23% (unchanged), derived from averaging: 1) the pref discount of the 2-factor model, and 2) the average preference shares discount to common shares during the past 1 month. Key risks include **1)** major deterioration in memory supply/demand, **2)** sharp contraction in smartphone margins, and **3)** mobile OLED market share loss.

Price Target Risks and Methodology - Samsung Electronics

Valuation methodology: Our 12m 2026E EV/EBITDA-based SOTP target price for the common share is W320,000. Our 12-month target price for the preference share is W245,000, which is based on our target pref to common shares discount of 23%, derived from averaging: 1) the pref discount of the 2-factor model and 2) the average preference share discount to common shares during the past 1 month. We are Buy rated on both the common and preference shares.

Key downside risks: 1) major deterioration in memory supply/demand, 2) sharp contraction in smartphone margins, and 3) mobile OLED market share loss.

Investment Thesis - Samsung Electronics

Samsung Electronics (SEC) is one of the largest tech companies in the world, with the #1 market share in several products including memory chips, OLED panels, smartphones,

and TVs. We expect the strong earnings power led by memory to continue, supported by our expectation of solid memory pricing continuing and also remaining at an elevated level. We expect this to be helped by the long-term agreements (LTA) with customers, with a higher level of binding commitment likely this time compared to the past. The company is starting to show meaningful progress in HBM, and also considering the higher scope for meaningful shareholder returns, we remain constructive on the name and reiterate our Buy rating.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at <https://www.gs.com/research/hedge.html>.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is

deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction

costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
