1Q GM/OPM improved on track, with more upside on pricing/ASP from new AI projects in 2H26; Re-iterate Buy (on CL)

8046.TW 12m Price Target: **NT\$1,115.00** Price: **NT\$947.00** Upside: **17.7%**

1Q26 result overview

NYPCB 1Q26 core business (OPI) was 4% higher than our estimate (which was the most bullish on the Street) and 13% higher than BBG consensus, thanks to the improving product mix and the much better pricing condition for both ABF and BT substrates (GM was 15.8% (+3.3ppt QoQ & +10.8ppt YoY) in 1Q26 vs. GSe/BBG consensus at 15.3% / 14.2%). For earnings, NYPCB EPS was 22%/16% higher than GSe/BBG consensus, thanks to not only the solid core business growth, but also the high non-OP profit (NT\$246mn).

2Q26 outlook - improving product mix, pricing and profitability

For 2Q26, we expect the company's revenue to grow by 42% QoQ, thanks to the solid improving ABF substrate spot price (we expect NYPCB's ABF substrate spot pricing will go up by 30-40%+ QoQ in 2Q26) with a much better supply demand condition, and the improving product mix, considering the ramping demand from the high-end 800G/1.6T switch IC ramp (Tomahawk 5 & 6), whose ABF substrate is mainly produced by NYPCB (we believe the company holds 70%+ market share in the products).

In terms of GM/OPM, considering the solid pricing hike on ABF substrate spot price and the much improving product mix, we expect NYPCB's GM/OPM to reach 21.3%/18.2% (+5.5ppt / +6.1ppt QoQ), which should drive the company's EPS to NT\$3.5 in 3Q (+73% QoQ).

Investment thesis - Pricing hike + new AI projects + potential new capacity = long term Buy

As discussed (see [here](#)), we believe the overall ABF substrate industry has entered a solid pricing upcycle (like what we saw in 2020-2022, when NYPCB's GM increased from loss making before the cycle to 42.5% in the peak cycle period), and NYPCB, as the key

spot price ABF substrate player (70-80% of the company's ABF substrate revenue is contributed by spot price products), should not only enjoy a solid pricing uptrend but also an increasing exposure to the high ASP/margin high end AI projects (including Tomahawk 5&6 and TPU substrates), which should drive the company's ASP per sqft by 35%/57%/40% YoY in 2026/27/28.

Moreover, as the industry is in an extreme shortage stage, we expect NYPCB to expand capacity in coming quarters/years, which could potentially suggest a good upside risk to our already high earnings estimate (our 2026/27/28 EPS estimate is 90%/137%/97% higher than BBG consensus already).

Maintain our Buy rating (on CL) on NYPCB, with a new TP of NT\$1,115.

Earnings revision

We slightly revise down the 2026 revenue estimate by 1% to factor in the slower than expected capacity expansion plans, but revise up the GM/OPM by 0.3/0.4ppt to factor in the potential better product mix in coming quarters. For 2027/28, we revise up our earnings estimate by 4/7% to factor in our more bullish view on NYPCB's product mix and ASP outlook, considering the much better product mix (driven by 800G/1.6T switch IC demand and TPU demand).

Valuation

We are Buy rated on NYPCB, with a new TP of NT\$1,115 (from NT\$970), based on the new 2027 P/E of 21x (19.0x previously). We believe the company could trade at 1.5x STDV above the past upcycle average P/E of 13.3x as we expect a better pricing outlook in spot price market this time (vs. last upcycle in 2020-2022), considering the much

better customer mix and the much better demand visibility.

Investment Thesis & PT methodology and risks

Investment Thesis - NYPCB

NYPCB manufactures and markets printed circuit boards (PCBs) and integrated circuit (IC) substrates (including ABF and BT substrates). We are Buy-rated on NYPCB considering the company's high exposure to BT substrate and non-LTA ABF substrate (70%+ of total revenue), where we expect GM/OPM to increase significantly in the coming quarters (from breakeven in OPM in 1H25 to 25/35% in 2026/27E) due to the favorable substrate pricing outlook. Despite the company's low exposure to high-end ABF substrate industry (<20% of total revenue in 1H25), we believe the expanding demand from ASIC AI server and high-end switch IC demand will drive the company's high-end ABF revenue exposure to 40%+ by 2027E, suggesting better GM/OPM outlook in the long term. In 2H25-2H26, we believe NYPCB will continue to benefit from the better ABF/BT pricing and should be a key beneficiary of the pricing uptrend considering the company's key focus on BT and non-LTA ABF substrate industries. Moreover, in the long term (after 2026), we expect the ABF industry to return to supply tightness, and NYPCB's expanding high-end exposure will lead to a long term earnings growth outlook (93% 2026-28E earnings CAGR). As a result, we see solid upside potential for NYPCB's earnings and stock performance.

Price Target Risks and Methodology - NYPCB

Valuation methodology: Our 12-month target price of NT\$1,115 for NYPCB is based on 21x 2027 P/E, which is +1.5x STDV higher than the past upcycle average P/E (13.3x).

Key downside risks: (1) Slower-than-expected PC demand recovery, (2) Slower-than-expected ABF substrates pricing upgrading outlook, and (3) Slower-than-expected NYPCB new high-end capacity qualification progress.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.
